No fee. Why should we have to pay for water we have collected and stored

9. What would be the likely impact on your business or industry if water licence and permit fees were introduced?

Being an aquaculture business that recycles our water how would you be able to determine the amount of water used that we would be charged for. I don't see why we should be charged for water we have stored at our cost.

10. If water licence and permit assessment fees were introduced, how could the collection of fees be timed to better support your business or industry? For example, would you benefit from paying fees up front, at the end of a licence assessment or annualised over the term of the licence?
