Sector: Agriculture

NATIVE VEGETATION CLEARING

1 . Would a strategic approach to clearing, through a strategic purpose permit, benefit you?

Response: no
Comments:

2. Is the 'purpose component' reasonable to apply considering the added complexity of assessing this type of clearing permit?

Response: unsure
Comments:

3. Is the proposed fee structure fair and does it adequately reflect differences in the financial capacity of clearing permit applicants?

Response: unsure
Comments:

4. What is the likely impact on your business or industry of the proposed clearing fee structure?

Comments:
None

5. Additional comments regarding Native Vegetation Clearing not addressed in the questions above.

Comments:

WATER

6. Do you consider it reasonable for taxpayers to pay 100 per cent of the cost of assessing water licence and permit applications and if so, why?

Response: no

Comments:

The cost to manage water should be shared across all bore holders and with this i include metro areas, mining and rural areas.

The burden should not be left to one group to carry the burden of cost.

7. If water licence and permit assessment fees were introduced, what do you consider to be an appropriate fee for a water licence or permit application?

Comments:

\$50 dollars for every bore hole in Western Australia per year would cover administration cost.

8. Would you consider a risk-based model for determining water licence and permit application fees to be appropriate? If not, what basis could the department use to structure fees?

Response: yes

Comments:

Yes, around the Perth Metro area there needs to be a tighter enforcement as Metro People have access to Water supplied to there houses but in most of the rural areas there is no water supply and these people have to rely on bores with windmills and pumps to supply water for there house hold requirements.

9. What would be the likely impact on your business or industry if water licence and permit fees were introduced?

Comments:

We are only a domestic use of water only *10. If water licence and permit assessment fees were introduced, how could the collection of fees be timed to better support your business or industry?

For example, would you benefit from paying fees up front, at the end of a licence assessment or annualised over the term of the licence?*

Response: annual

Comments

11 . Additional comments regarding Water licences and permits not addressed in the questions above.
